

WEDDING PHOTOGRAPHER

# Welcome to Love of My Light

I love capturing moments of life and emotions, and I also enjoy taking more posed photos with beautiful light and beautiful locations... I think it's important to have both.

I edit photos mainly to clean up the background, but also group photos so that everyone has their eyes open and is smiling. I edit the skin and small details a little more in photos of couples and portraits of the bride and groom.

# Photo Album

When I have finished editing the wedding photos, I will create a private photo gallery to share with your friends and family, which will also allow you to choose your photos for the photo album.

I include this with all my wedding photography packages because I believe it is important and provides a source of beautiful moments with family and friends to relive the day together.

I love digital photos and find them convenient for sending photos to distant family, but I find that looking at a photo album together is a totally different experience.

It is a photo album that is printed in Canada with quality materials, and I am happy to work with this company.

# We need to meet up

**Do you like my work?**

**We need to meet (in person or remotely)**

**to talk about you, talk about me, get to know each other a little better...  
because you'll be seeing a lot of me on your wedding day.**

**I like to learn a little more about you, find out about your passions,  
what you like to do, the important people in your family who will be  
present at the wedding, etc.**

**All this so that I can capture every detail and focus on what is important  
to you.**

## What's included in my package?

My packages include:

An in-person (or remote) meeting

A location scouting session

The creation of a private gallery for choosing photos for the album.

A printed photo album.

---
